

FCCF Mentorship Program

Goal – To establish a strong, educational relationship between the young people of our industry and established highly knowledgeable respected leaders providing relevant training and mentorship with the opportunity to broaden the mentees network and connect with industry stakeholders to positively impact personal development and success.

Who can apply – young people in the age bracket of 22-30 years of age who have interest in the Charolais/Cattle Industry and are a Canadian resident.

Once all the applicants are received the Mentorship Committee will select mentees to participate in the 2024 FCCF mentorship program. The Mentorship Committee will leverage their industry relations to provide a match with a hand-picked expert in the mentee's specific field of interest. Once matched with their respective mentors, the mentee/mentor journey begins. Through the creation of an initial roadmap, the mentor and program participant set out the goals they wish to achieve during the program. Program participants are granted a budget of \$2000.00 to fund their participation in industry events and learning opportunities! Mentors will be asked to volunteer their time to help guide the youth in business discussions and points of interest that will aid in the mentee becoming successful in their field. This will be a formal commitment through 2024.
